

## LAST MINUTE INFORMATION

Flight season 2009 in the great World Homing Pigeon History is a stage which ends active, sport activity of Gijs Peters, Oliemans from the Netherlands – my friend, master and mentor in homing pigeon flying at short and medium distances.

### Support for the breeder in receiving from the original "Olieman" pigeon - house (dove-cot) breeding material of high and fixed quality

In most cases, document analysis of authorized purchases indicates that after a few years, blood from the purchased pigeons is dominant, changing it positively.

In many pigeon – houses purchased pigeons became a base for new family and/or line creation.

My company's reliability and close, partner relations with Gijs Peters guarantee original pigeon material for the breeder.

Good „Olieman” breeding pigeons is well documented through its national and European position among breeders as well as through participation in European and world exhibitions, pigeon auctions in China, Taiwan and the USA and international pigeon markets ( for instance in Kassel and Dortmund).

The offered pigeons have excellent origin and quality well documented by their parents.

Pigeon origin is based on pure blood, and pigeon breeds coming from remarkable grafts and breedings.
